
Project Name : Student Room Finder

Project Description : The Student Room Finder is a user-friendly Android application designed to help students easily find and post available rooms for rent near their educational institutions. Aimed at simplifying the room-hunting process, the app offers a streamlined experience with modern UI design, secure authentication, and intuitive navigation.

Key Features:

Login & Registration:

- Secure sign-in and sign-up functionality using Firebase Authentication.
- Ensures only verified users can post or view rooms.

Room Details Page:

- Displays comprehensive room information including rent, location, amenities, and photos. User can contact the room owner, chat on whatsapp and get the directions. User will book the room on this page.

-
- Designed with an aesthetic, responsive layout for ease of use.

Room Adapter:

- Implements a custom adapter to efficiently display room listings in a RecyclerView.
- Ensures smooth scrolling and optimized performance even with multiple listings.

Post/Upload Room Page:

- Allows authenticated users to post new room listings.
- Users can upload images and input essential details like rent, location, and contact info.

Main Activity:

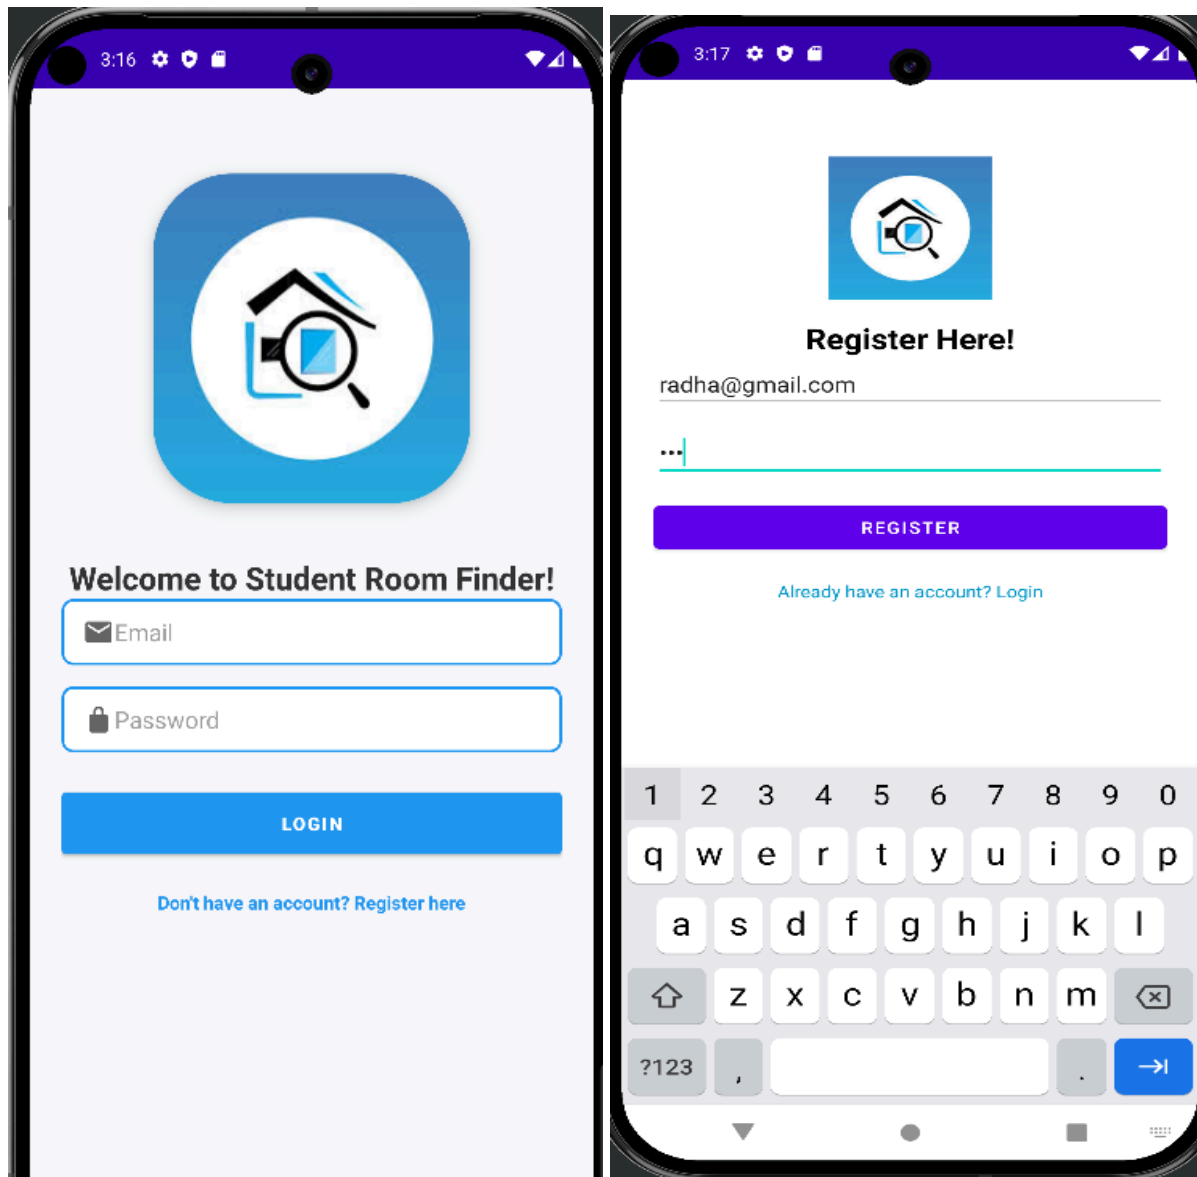

- Acts as the central hub of the app, combining navigation and primary functionalities.
- Beautifully designed with clean layout, card views, and smooth transitions.

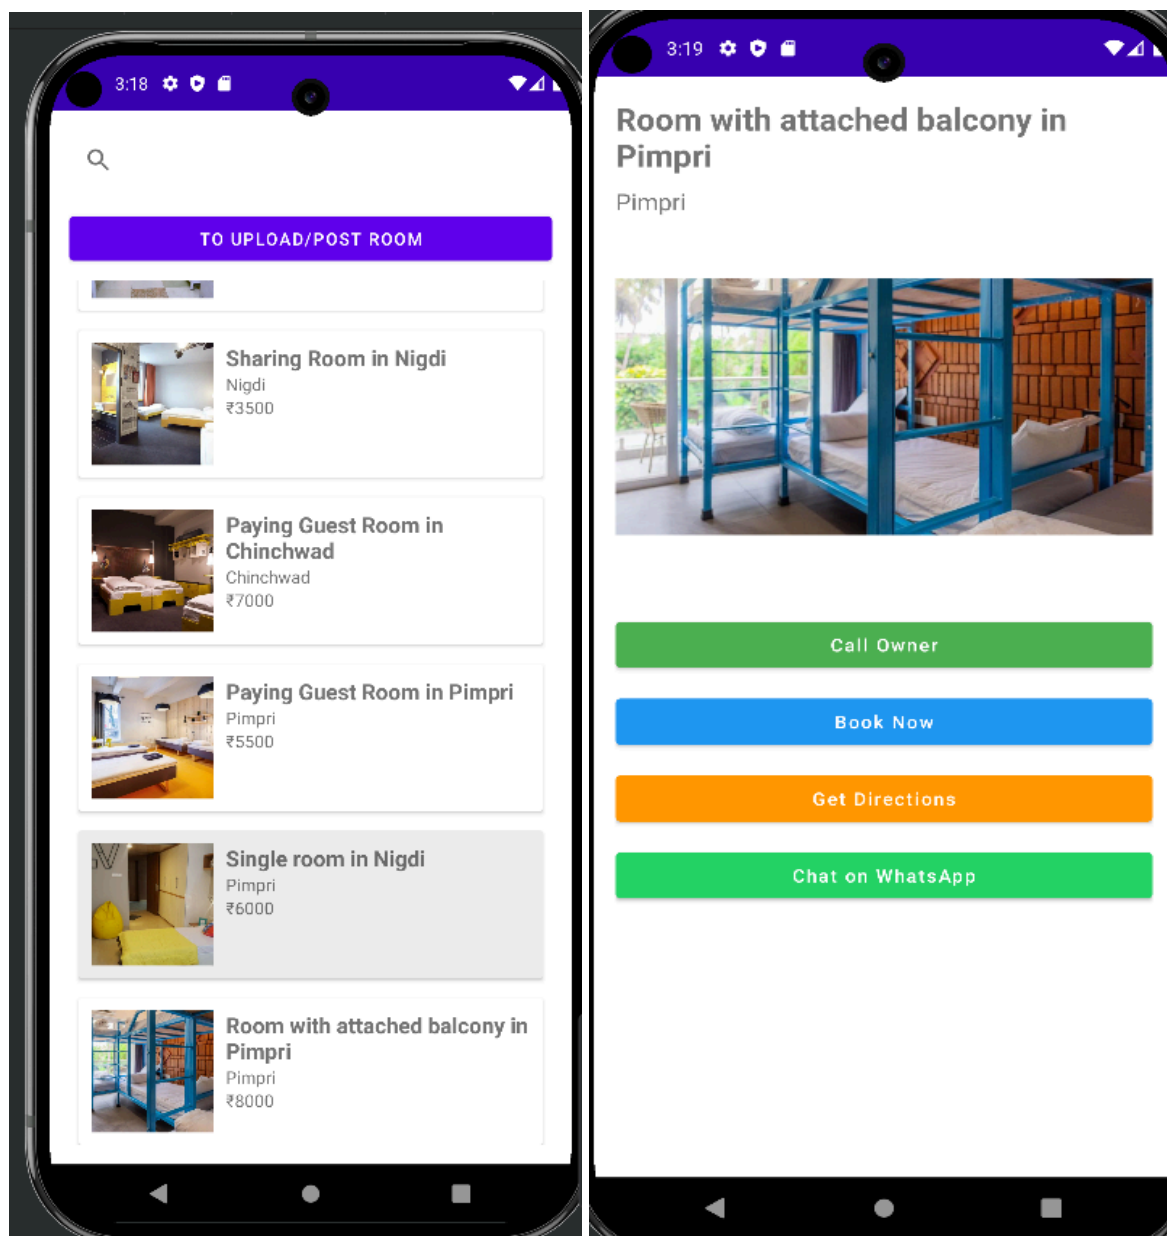

Tools & Technologies Used:

Android Studio (Java), XML for UI Design

~ This project empowers students to find housing efficiently, helping reduce the stress of accommodation searches during academic transitions. It also builds a student-driven community where room availability is updated in real-time.

OUTPUTS OF THE PROJECT:

TO UPLOAD/POST ROOM
